

MAIN SKILLS

Innovative projects management - CTO

Wide culture of the medias and web area - technologies, concerns, trends
Team build-up, design, realization, deployment, support
Functionnal analysis, planning, technology choices and decisions
Requests for bid, partners and contractors identification

Web and medias architecture - pragmatic change management

Critical and high-load hosting platforms (VoD, e-commerce, information medias)
Defining technical infrastructure guidelines and urbanization
Mentoring teams in implementation and skill development
Implementing micro-service architecture, containerization (Docker)
Virtualization and cloud migration (private/public)

Technical expertise areas

Critical and high-load hosting platforms (VoD, e-commerce, information medias)
DevOps transformation & continuous integration CI/CD
HTML/CSS, Git, RubyOnRails, DNS, Debian, MySQL/MariaDB, Apache/Nginx, Postfix
Network architecture from L2 to L7, proxies, VLAN 802.1q
IoT ecosystems and smart home, distributed platforms

WORK EXPERIENCES

Solutions Architect - Digital business unit

La Française des Jeux (FDJ) - Paris (France) - 2017

Defined the target micro-services architecture

Defined and executed the migration towards this service-based architecture
Raised management's awareness about state-of-the-art - SOA, REST, micro-services
Handled tech choices, data modeling, execution along with teams
Enforced choices by exchange with other business units

Supervised and guided development teams

Monitored tech-lead developpers with weekly workshops
Orgaznized and presented several internal talks - projects feedback, RabbitMQ messaging...
Defined architecture solutions for day-to-day projects

Moved to continuous integration and deployment (CI/CD) with Docker

Introduced containerization on Docker Swarm hosted on a public cloud provider
Built automated pipelines for the new development projects
Offered guidance and skills development for quality assessment and production teams

Built a reference team based on NodeJS/MongoDB + lean management

Introduced NodeJS and MongoDB technologies all across the company
Implemented full automatization of the development process - build, test, deploy
Obtained strong involvement of developers, testers, business experts and quality teams

Micro-services platform architect

RueDuCommerce - Paris (France) - 2016 - 1 year

Refined the transformation trajectory of the ISD

Led architectural approach development with teams

Automated and implemented CI/CD (on containers and private cloud) practices

Developed technical models for the new architecture

Bruno Medici

Freelance web architect

 Paris 13 + Lille Centre

EDUCATION

Engineering master degree

ENIC Télécom Lille (France), 2006
Mobile communications: GSM, UMTS
Marketing of information technologies

Training and workshops

Google Cloud Platform Fundamentals
and Architecting (Paris)
RailsConf 2010/Baltimore, 2009/Las
Vegas, 2007/Berlin
ParisOnRails 2007/Paris
PHP Conference 2004/Amsterdam,
2002/Munich
Cisco CSPFF & CSPFA (PIX Firewall
Advanced)
PSC1 civil emergency prevention

DUT Networks & Telecoms

IUT, Nice-Sophia, 2000
Higher National Diploma

Baccalauréat Scientifique

School diploma in Sciences

Video platform reengineering architect

France Télévisions Editions Numériques - Paris (France) - 2014 - 4 years

Re-designed the new Replay production platform at France Télévisions (all contents, 18-months project, several experts)

- Full conception of the new platform from scratch, designed workflows and technologies
- REST-API architecture based on micro-services orchestrated by an in-house scheduler
- General and detailed technical specifications, API authoring, developers team support and coaching
- End-to-end SCRUM from specifications, development, deployments, aiming continuous deployment
- Successful production since Q2 2015, fully operational 300+ programs per day

Initiated and build the "rest-ftp-daemon" open source micro-service project

See Opensource projects below

Led re-conception of the central video assets system

- Raised awareness about state-of-the-art: SOA, REST, micro-services
- Project leadership with technical teams and top managers

Led strategic collaboration on several projects across the Group

- Defined architecture workframe for Zoom (on-demand recommendation of content)
- Managed architecture for the cross-products tagging system
- Connected TV services upgrades
- Overhaul of the platform for channels and programs websites

Initiated the global messaging system (AMQP) for realtime notifications

- Connecting each platform of the Group (Pluzz, CultureBox, FranceTV Info/Sports/Education...)
- Interacted with commercial partners (Molotov.tv, Orange...)

Hosting specialist - change management

Société Générale - Paris (France) - 2013 - 6 months

Took over the activity of the branch Crédit du Nord (integration and maintenance perimeters L2/L3)

- Transferred knowledge and documentation to multiple teams on Société Générale side
- Acquired leadership for ongoing integration projects, helped takeover for L2 and L3 support teams

Studied convergence of Crédit du Nord and Société Générale solutions and technologies

Successful operations - excellent level of cooperation with legacy teams and new teams; support and project were organised and fully operational

Consulting architect - network and security

SAFRAN Groupe & SNECMA - Réau (France) - 2012 - 3 months

Migrated skills and responsibility for the whole company network bastion, from SNECMA branch to SAFRAN headquarter

- Explored perimeter, methods and potential risks
- Reverse engineering and back-documentation of main topics
- Consolidation de diverses plateformes multi-sites

Brought internet technologies culture and expertise

Urbanist & architect for the new VoD platform

CANAL+ - Lille (France) - 2011 - 18 months

Urbanized target video-on-demand platforms for the whole CANAL+ group

- Proposed architecture rationalization systems (ARM) and methods for every offer like CanalSat, Canal+, CanalPlay Infinity and replay-tv (encoders, media provisioning, etc)
- Introduced SOA concepts and global workflow functions
- Described and modelled business process for the entire VoD production stack

Defined the target architecture

- Standardized webservice interfaces with ingest functions, transformation and transcoding, media files provisioning to partners.
- Wrote technical specifications basis

Lead the call for bids for the workflow engine function

- Coordinated RFI and RFP with 12 major media providers, international and national partners (documents mainly written in English).
- Organized proofs-of-concept for the top 5 solutions
- Ran project in close cooperation with CTOs and top management

Managed the storage restructuring project within Diffusion branch (> 1 petabyte)

- Made technical recommendations for transcoding storage, distribution and long-term archives
- Led the project team, defined specifications, horizontal and vertical scalability

INTERNATIONAL

Mobility • France, english-speaking areas, world

French • mother tongue

English • fluent (TOEIC 920)

Italian • basic (father)

INTERESTS

Scuba diving • N2 PA40/PE60 TDI
Deep+Nitrox

Private pilot • Ultra-light licence (BB)
Private pilot license upcoming (PPL)

Photography • Studio, tourisme, portrait, exploration urbaine

Smart Home • User & custom modules creation

RubyOnRails • Dev/R&D

President of LilleSansFil (<2005) •
Free metropolitan wireless network / wifi
Strategy, press and institutions relations
Embedded systems, mesh networking

20181123-023708

Internet and security architect

Crédit du Nord, Société Générale - Lille (France) - 2010 - 1 year

Practiced technical architecture and evolutions of Customers Internet platforms

Worked with several several firewalls, reverse proxies, load balancers, IPS, Redhat/OpenBSD
Brought HTTP expertise, caching, filtering, L7 routing through Apache mod_rewrite
Introduced methods and tools for configuration versionning and deployment

Defined hosting architecture for Mobile Internet services (customers of 7 branches/banks)

Implemented mobile-specific caching, protocols and compression
Revived staging platform to allow better testing and team work (same as production)

Architect onboard service platform on TGV trains

SNCF/BOLLORE - Paris (France) - 2009 - 6 months

Defined and built a service platform with internet access, aboard of TGV-Est trains

Audited the technical architecture proposed by the consortium Orange, Cap Gemini, Alstom, Eutelsat
Recommended updates and improvements leading to new commercial opportunities
Participated in the founding of the joint venture between Bolloré-SNCF, key public project

Defined technical fonctionnal architecture for onboard and ground-train link

Directed development of embedded-specific interfaces

Audit and content-delivery providers selection

FRANCE 24 - Paris (France) - 2008 - 1 months

Audited coupling between business-critical systems and content-delivery providers

Published optimization recommendations for the hosting architecture, set basis for a tender session

Information system architect

Reims & Chaumont Hospitals - Reims (France) - 2008 - 3 months

Set up a system federating data for several hospitals, sase study and recommendation of a technical architecture, security expertise, workflow

Helped project office, requests for bid, facilitated developments

Web and medias strategy consultant

FRANCE 24 - Paris (France) - 2007 - 6 months

Lead the 2007 coverage of the French presidential election on the web

Animated the dedicated project-oriented team: moderators, translators, 20 international bloggers.
Experimentation of the media convergence (broadcaster, internet and television audience).
Website providing live video streaming, real-time breaking news and campaigners results, internet visitors reactions, 5 webcams in the newsrooms, at the information source.
SMS-number offering interaction to the audience.

Provided strategic support for the IT department

Strengthened the image of France24 in the world, and on the blogosphere (more than 98'000 visitors for both ballots).
Built the team and the methods around the required technical skills.
Implemented various projects thereafter, within the channel's teams (Cannes Festival, general elections, etc)

Conducted and wrote the request for bid for the new web infrastructure

Co-founder and CTO of Itool Systems

Itool Systems, SaaS software editor - Lille (France) - 2001 - 5 years

Associate and co-founder, board member

Itool Systems creates and sells online business solutions for SMC and Professional Accountants
Launched portal itool.net (Prof accountants) and itool.com (SME market)
Obtained an Innovation Trophy at the Accountants Annual Congress in 2001, IntraBlog Award in 2007.

Architect and production executive

Designed billing infrastructure and online registration processes.
Deployed a robustness-oriented hosting cluster (20 servers over 4 sites) certified by IBM's SPC lab.
Reached great service availability avg 99,96% ranked n1 by ip-label in May 2005

Development team manager (5)

Realized as a team leader - Itool Compta, Itool Facto, Itool Scan, Itool GED, APG Facto, press routing solutions, data-exchange hub with partners.
Supplied technological intelligence, ergonomics of applications, development methodology.

Integrated and then absorbed Atomis

Team leader, development of Itool Compta

Atomis, Internet Services - Lille (France) - 2000 - 2 years

Designed an online software offer

Build the Itool line of products - accounting, invoicing, digital documents management

OPENSOURCE PROJECTS

rest-ftp-daemon

Industrial-grade files transfers on FTP/sFTP/FTP/S3 controlled by a RESTful API.
Instrumented by NewRelic, build by CodeShip+BuddyWorks, code quality by CodeClimate. Deployed in production since 2016 for France Télévisions - transferring 300+ video files 2TB+ daily.

rbpm - Ruby Business Process Manager

Workflow manager to orchestrate RESTful microservices.

pushyd - Realtime push messages proxy

Realtime events diffusion from an AMQP broker to partners on HTTP POST requests.
Used by France Télévisions to propagate start/end program events to VoD platforms

service-graph

Dependencies computing and graphing among microservices which are detected on Gitab.
